Hello InfluenceMap,

I want to be part of the InfluenceMap as junior developer. I am very passionate about technology and software , I am inspired by your mission to tackle the climate and biodiversity crises through innovative data-driven solutions. I do be highly grateful to contribute to your cause and organization with my skills in full stack development.

During my academic, hobby, and freelance projects, I developed an e-commerce platform with a payment gateway, a multi-user chat app, and a video calling app. I am familiar with system design and proficient in data structures and algorithms. As an active learner and team player, I thrive in collaborative environments and continuously seek to expand my skills.

What excites me most about InfluenceMap is your commitment to leveraging data to drive meaningful change. I am particularly drawn to your LobbyMap and FinanceMap platforms, which provide critical insights into corporate climate lobbying and the financial sector's climate credentials. I am eager to contribute to the development and maintenance of these platforms, ensuring they continue to deliver accurate and impactful results.

I want to be part of InfluenceMap because your mission to address the climate and biodiversity crises through data-driven solutions deeply resonates with me. I first came across your work while watching a BBC News segment on youtube, where your LobbyMap platform was highlighted for its groundbreaking analysis of corporate climate lobbying. This inspired me to learn more about your organization, and I was impressed by your innovative projects like FinanceMap and Carbon Majors, which are driving real change in the fight against climate change.

I am eager to showcase my abilities and prove my value to your team. I am ready to take on any problem statements or assignments to demonstrate my skills and willingness to contribute to your mission.

Sincerely,

Prakhar Vishakarma
